

You are to go to the Library's home page and find an article on _____. This article must be at least 250 words and must be published within the last 6 months. You may not have the same article that your neighbor has. Try to find an article that is of interest to you and not the first one that you come across. Once you have your article, read it and then fill out the triangle. Be prepared to discuss your article with the class.

Now that you have completed the triangle, find an article that answers the questions you have. The same article may not answer both questions. Make sure to put the answer to your question on the outside of the triangle on the side of your questions. The questions you ask may not be yes / no or obvious answer questions. Finally attach all three articles to the back of this paper.
